

## SMP deliver incident free on specialised scope

Having successfully completed project work onsite at Beenyup Water Treatment Plant, SMP were chosen as a key subcontractor direct to the W2WA alliance team for a specialised work scope.

The scope included installation of 2 boilers and 6 heat exchangers and all associated carbon, stainless, MSCL pipe work, valves, fittings and structural steel. The SMP Project team also provided coded welding and materials traceability support.

SMP provided a crew of up to 25 on this project from December 2009 to June 2010. The project crew consisted of a Superintendent, Project Engineer, QA/QC and Execution Team of coded welders, pipefitters, boilermakers, mechanical fitters, riggers, storemen and trades assistants. The skill set of the crew ensured the specialised scope and other miscellaneous works could be managed effectively.

### Project Key Facts

**Project Owner**

Water Authority

**Project**

Beenyup Water Treatment

**Client**

W2WA Alliance

**Value**

~ \$ 147M AUD

**SMP Scope**

Project Crew of 25
