

Positive outcome for new BHPB Non Process Infrastructure (NPI) project

The Area C mine is an iron ore mine located in the Pilbara region of Western Australia, 92 kilometres North West of Newman. The mine is owned and operated by BHP Billiton.

SMP Engineering were contracted to assist with the delivery of a multidiscipline construction project which included the following components;

- + A new heavy vehicle workshop
- + New lube storage & dispensing facilities
- + Refurbishment & new extension to the existing Ammonium Nitrate store
- + Extension of services in the existing heavy vehicle workshop

SMP supplied the below resources to work as an integrated part of the Clients team:

- + Project Manager
- + Superintendent
- + Commissioning Engineer
- + Supervisors x 4
- + Multidiscipline Project crew to support install

The project was executed safely with zero incidents and aligned with both Kerman and BHPB stringent HSEQ systems.
